

# FPP Power Fabric

Power-delivery architecture for the FPP multi-physics package platform.

IP-160 · Architecture IP · Architecture

## Function and architecture

- Package power-delivery architecture
- Power constraints participate in the common FPP compiler/evidence model

## Integration summary

FPP Power Fabric integration role: Package power-delivery fabric. Documented composition: One of the co-designed package fabrics / bridge hierarchy.

## Technical record

|                            |                                                           |
|----------------------------|-----------------------------------------------------------|
| Canonical identity         | IP-160                                                    |
| Responsibility             | Package power-delivery fabric                             |
| Documented building blocks | One of the co-designed package fabrics / bridge hierarchy |
| Delivery boundary          | Architecture                                              |
| Evidence scope             | Architecture IP                                           |

## Delivery and release binding

- Interface version and parameter set
- Clock/reset domains and integration constraints
- Companion memory, PHY and software requirements
- Verification collateral and acceptance criteria

Confirm for the selected release: Node/library binding, Clock/reset limits, Physical and protocol dependencies, Artifact hashes, Acceptance criteria.

## Evidence and qualification

Canonical technology and its architecture/integration role are recorded. The offered delivery is confirmed against the exact release before licensing.

No node-port, silicon-performance, standards certification or analog qualification is inherited from a related product.

Canonical status: Architecture

Source basis: Bible v7.42 IP-160

## Evaluation and licensing

Evaluation: Evaluate an individual IP configuration. Production: Named-design production license. Custom work: Node binding or derivative integration. Rights, pricing, support and acceptance criteria are agreed for the exact scope.
